SUBJECT 000 · ANALYSIS

LEE SANHEE

I design brand identities and carry them into live websites, from first concept to launch.

01 ROLE
Brand & visual designer.

02 SIGNATURE
Monochrome. Editorial. Chrome.

03 METHOD
From first concept to a live site.

04 STATUS
Open to roles & collaboration.

05 TOOLS
Figma, Blender, AI. Always disclosed.

06 BASE
Daejeon, Korea. Remote-ready.

EXPERIENCE

2026.09–NOW	**Freelance Brand & Web Designer** AURA SEOUL (self-employed) · remote
2026.06–08	**Expense Audit Assistant** Daejeon Election Commission
2026.05–06	**Research Data Labeling Assistant** LigaChem Biosciences
2025.09–26.02	**Office Support** Duol
2023.12–24.01	**Client Reception** Shinhan Bank PWM Center
2023.10–12	**Data Center Operations Support** NAVER Data Center GAK Sejong

EDUCATION

2024 – 2025	**BBA** · Edu-Up Lifelong Education Center (Academic Credit Bank)
2022 – 2024	**Emergency Medical Technology** · Daejeon University (no degree)

CERT · LANGUAGE

2025	**SMAT Level 1**
LANG	**Korean native · English, Japanese conversational**

SKILLS

Brand Identity · Visual Systems · Brand Guidelines · Art Direction · Web Design · Landing Pages · Responsive Layout

TOOLS

Figma · Blender · Midjourney · ChatGPT · Claude · Gemini · Vercel · Supabase

AI tools are part of my workflow. Where images, video or code are AI-generated, each project says so. The portraits here are my own photo, restyled with AI.

SPEC-001 · VIEW 01

AURA SEOUL

SPEC-001 · BRAND IDENTITY · PERSONAS

AURA SEOUL

A self-initiated brand moving from personal branding toward fashion. Black and silver, metallic texture, and two personas, SAN and HEE, lead the world.

ROLE	Brand direction, identity, personas, web
YEAR	2026 —
TYPE	Self-initiated brand
TOOLS	AI image tools · 3D · Web

LIVE
auraseoul.kr ↗

001

SPEC-001 · AURA SEOUL · BRAND IDENTITY · PERSONAS

01 GOAL

A brand that feels human without a face. The name is public; hands, screens, voice and two personas stand where the face would be.

02 CONCEPT

SAN wears straight hair with full bangs that always hide her eyes; HEE wears a slicked-back ponytail and sunglasses. Both dress in black-led monochrome. A chrome logo, a star symbol and Auri, a serpent drawn like a human spine, are the brand marks.

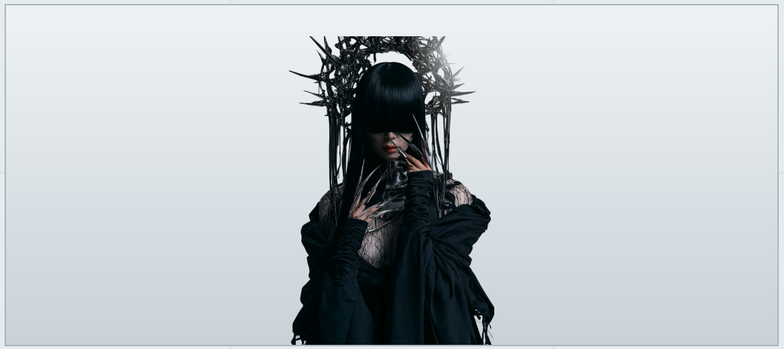

03 PROCESS

01	Found the tone through AURORA, an early visual study with its own characters.
02	Rebuilt the cast as two personas, SAN and HEE, with written visual rules.
03	Split the web assets into Web Atelier, Signal, AFTERIMAGE and Digital Studio, each its own site.
04	The chrome logo, star symbol and 3D serpent mix my own work with AI and external sources, and I say so.

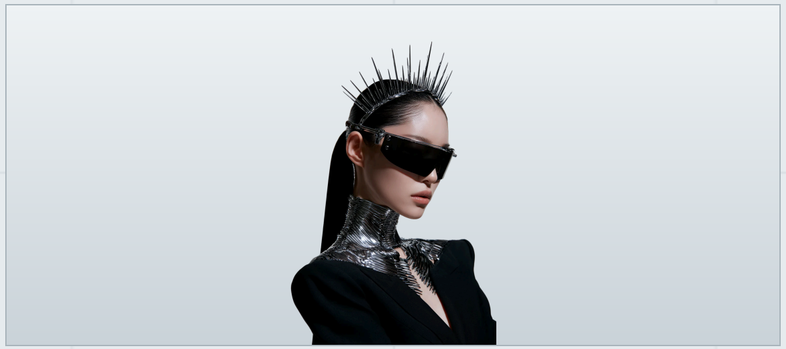

04 LEFT BEHIND

× The early AURORA characters → replaced by SAN/HEE

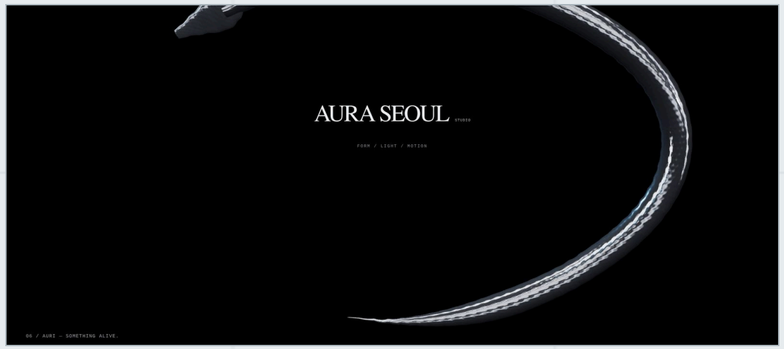

05 RESULT

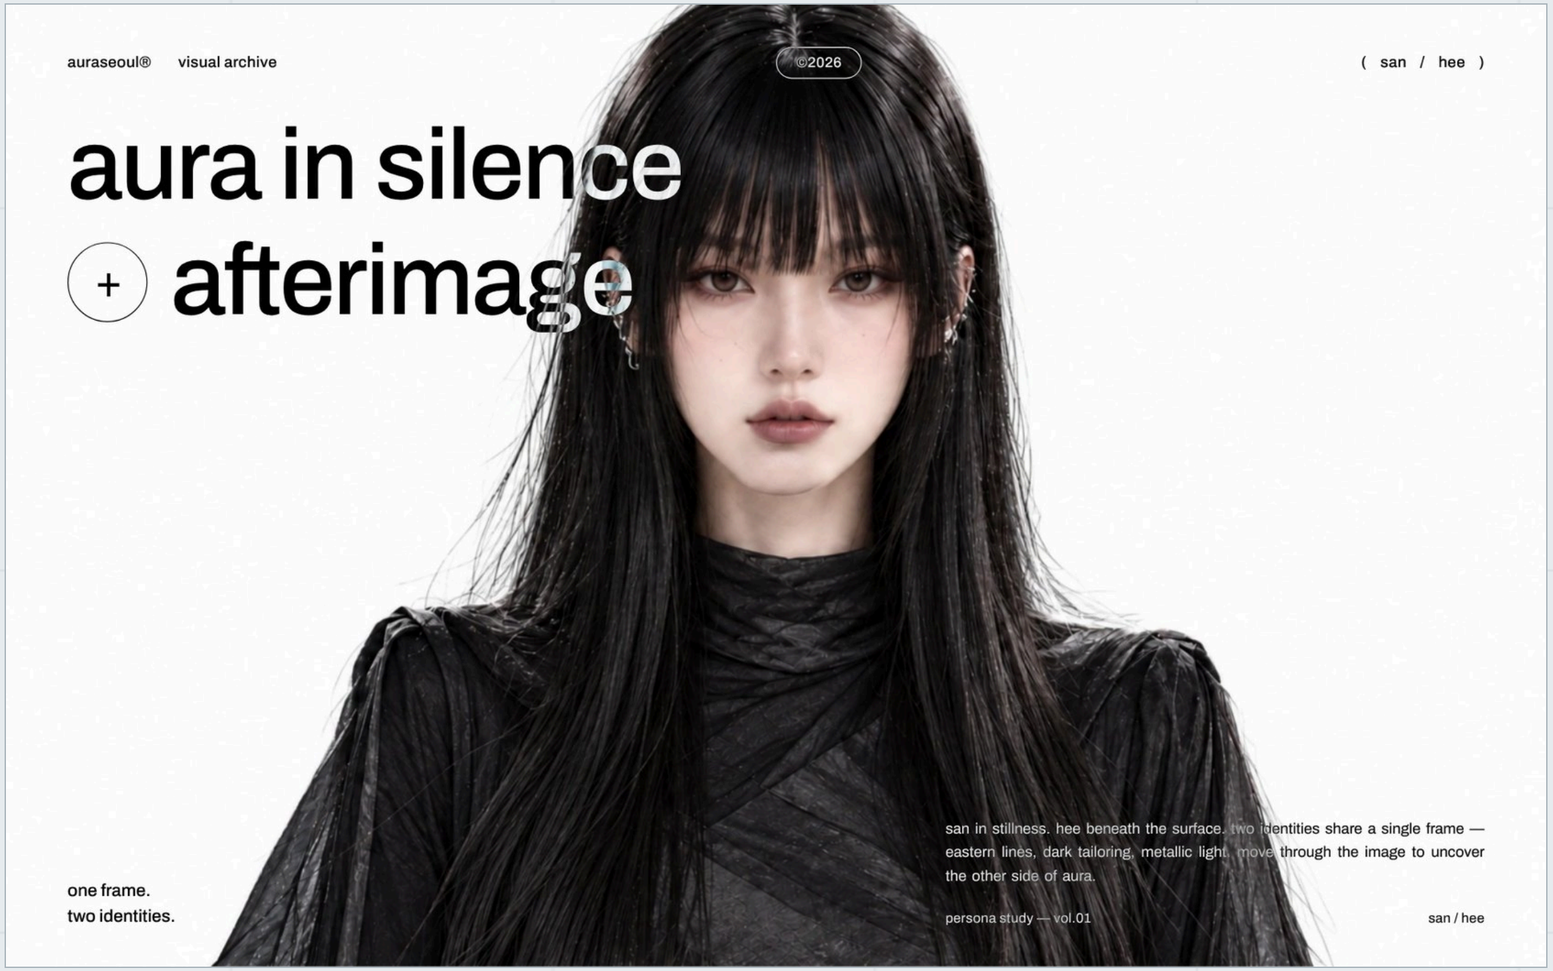

SAN, VARIANT

HEE, VARIANT

AURI, THE CHROME SERPENT, AROUND THE WORDMARK — THE LAST SCROLL SCENE

SPEC-002 · VIEW 01

AFTERIMAGE

SPEC-002 · DIGITAL FASHION · LOOKBOOK

AFTERIMAGE

Six looks and a campaign archive for a fictional fashion line. AI-generated visuals, disclosed on the site.

ROLE	Concept, visuals, web build
YEAR	2026
TYPE	AURA SEOUL, self-initiated
TOOLS	ChatGPT image · Midjourney (motion) · OpenAI Codex · Meshy (tested)
STATUS	Desktop review is done; testing on real mobile devices is still to come.

LIVE

auraseoul-digital-showroom.vercel.app ↗

002

SPEC-002 · AFTERIMAGE · DIGITAL FASHION · LOOKBOOK

01 GOAL

Show garments that do not physically exist as if you could step up and inspect them.

02 CONCEPT

Depth from flat images: shadow, tilt and zoom turn a page into a room.

04 LEFT BEHIND

× A showroom built from Meshy 3D models (on hold)

03 PROCESS

01 Tested a 3D model of LOOK 01 in Meshy.

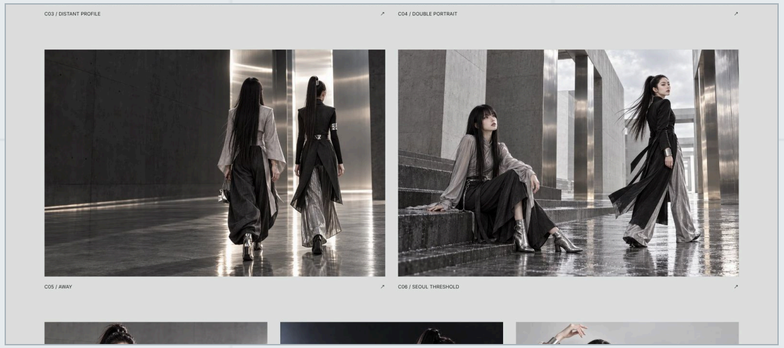

02 Switched to a dimensional 2D showroom based on quality and schedule.

03 Added cast shadows, cards that tilt with the cursor, and zoom.

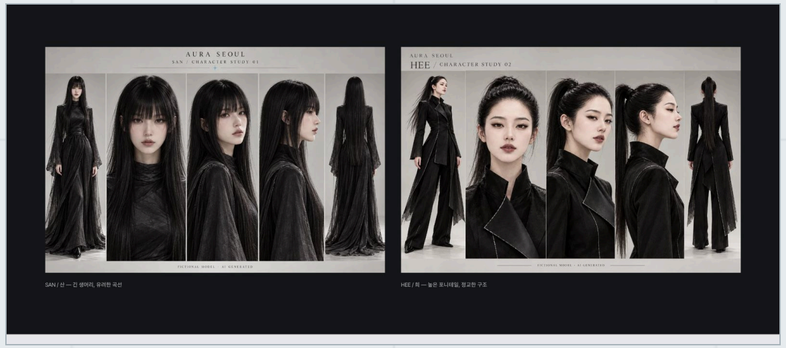

04 Cleaned up cut-out edges and checked on desktop.

05 Built the lookbook site: six looks, a 15-shot campaign, the two personas, and a notice stating which AI was used where.

05 RESULT

CAMPAIGN ARCHIVE — 15 SHOTS

THE TWO PERSONAS, SAN AND HEE

AI NOTICE — TOOLS AND WHERE THEY WERE USED

SPEC-003 · VIEW 01

SILLAGE 01

SPEC-003 · PRODUCT CONCEPT · WEB STORE

SILLAGE 01

A concept fragrance store built around “the afterscent of a city”, with AI-directed product photos and a scroll-driven night walk. Nothing is actually for sale.

ROLE	Concept, product visuals, web
YEAR	2026
TYPE	Coursework · Concept product
TOOLS	AI image tools · Web
STATUS	Currently through chapter 1.

LIVE
sillage-onew4.vercel.app ↗

003

SPEC-003 · SILLAGE 01 · PRODUCT CONCEPT · WEB STORE

01 GOAL

Translate something invisible, a scent, into form and material.

02 CONCEPT

What a city leaves behind after you pass through, expressed as metal and lingering light.

03 PROCESS

01	Set the concept, “the afterscent of a city”.
02	Chapter 1: designed the concept product.
03	Strung six scents (Nº 01—06) along a night from 10 pm to 6 am, so scrolling becomes a walk.
04	Built the line, a discovery set and a journal like a real store, and said at the top and bottom that it is a fictional brand with no orders or payments.

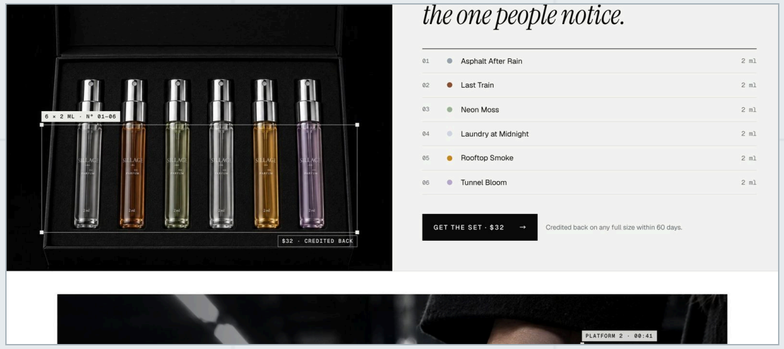

04 RESULT

THE NIGHT WALK — 00:34 LAST TRAIN

THE LINE — SIX STOPS, ONE NIGHT

DISCOVERY SET

SPEC-004 · VIEW 01

BE MY AURA

SPEC-004 · WEB · WEBGL · AI FILM

BE MY AURA

The site you are on. A reference moodboard became a set of design rules, then AI film and WebGL interaction tied to the scroll.

ROLE	Art direction, design system, web
YEAR	2026
TYPE	Personal portfolio
TOOLS	Claude · Higgsfield (Seedance) · three.js

LIVE
portfolio.auraseoul.kr ↗

004

SPEC-004 · BE MY AURA · WEB · WEBGL · AI FILM

01 GOAL

Deliver a grotesque, sacred world in a single opening screen, while making sure anyone who came for the work can find it fast.

02 CONCEPT

Every work is a numbered specimen. In a pale fog, a figure reaches toward the viewer.

04 LEFT BEHIND

- × White 3D hero with a silhouette persona
- × Cyber HUD with skeletal wings
- × Arms-opening film on white
- × A 3D bone serpent, Auri, passing in front of the figure

03 PROCESS

01	Sorted 50+ references into three groups: what to show, what frame to show it in, and how to open the first screen.
02	Wrote the design rules: colour, type, HUD elements and what to avoid.
03	Generated an 8-second film from the SAN image and tied its 97 frames to the scroll.
04	Layered ice motes and a HUD over the film, so the scene gains depth with the cursor and the scroll.
05	Rendered key scroll points, checked them and fixed what broke.

05 RESULT

01 — SAN IN THE FOG

02 — LIMBS UNFURL

03 — THE HAND REACHES YOU

OPEN FOR ROLES & COLLABORATION

CONNECTION

Open to brand, visual and web design roles and to collaborations. Remote work welcome.
